

# IT'S TIME FOR A CHANGE

Introducing the next generation IV change reminder that provides accountability at the push of a button.

TimeAlert™ IV

# Change is critical

- To prevent the risk of BSI, the CDC established guidelines for IV tubing changes
- Human errors can occur that affect change timelines, such as illegibility, wrong date/time, or missing label

## \$290,000

Average Annual Hospital  
CLABSI Costs

Estimate based upon 96-hour protocol, US hospital average infection rate 1.14/1000 central line days, average line days of 5,649, and average cost of \$45,000\* per BSI.

## 96%

of hospital infection control professionals agree that changing IV tubing on time helps reduce the risk of infection.\*\*

# Get the change you and your patients need with TimeAlert™ IV

## TIME-INDICATING REMINDER LABELS FOR IV TUBING CHANGES

When it's this critical, it should be this simple.

With TimeAlert™IV, any caregiver will know at a glance how much time has elapsed.

- Simple, smart indicator delivers an easy-to-read visual cue
- Reduces human error potential
- Seamlessly integrates into existing protocols
- Push-button activation plus active, color-changing technology easily indicates timing
- Strong adhesive securely attaches to IV tubing

## TIMEALERT™ IV CHANGES EVERYTHING

### TimeAlert™ IV (72-hour)

Start Date/Time: _____	
Change Date/Time: _____	
RN Initials: _____	

Time lapse viewing window
