

KangaBand® Wristbands

for use with the Broselow® Pediatric Resuscitation System

Positive identification is mission critical when it comes to pediatric identification. When resuscitation is imminent, every second counts. The color coded KangaBand wristbands are specially designed to help quickly and accurately identify size and weight categories of pediatric patients. They coordinate with the Broselow Pediatric Resuscitation System, which provides a quick reference for accurate medication administration and proper equipment usage. KangaBand is ultra-soft, flexible, and comfortable for patients, even those with the most delicate, fragile skin.

The Broselow system is an easy-to-use, color-coded information and reference kit that provides doctors and nurses with the proper equipment sizes, pre-calculated medication dosages, and infusion rates needed to perform resuscitation on a child according to weight.

Product Features:

- Available in 9 colors that coordinate with the Broselow System
- Write-on style wristbands feature a designated area to write in patient's weight (in Kg)
- Color-coded for quick, visual identification. Color name is also spelled out for additional reinforcement
- One size fits all. Fully adjustable
- Playful kangaroo design for pediatric patients
- Features patented SecurSnap®, tamperproof closure for added security
- Latex-free, phthalate-free
