

# Precision® Neonatal Foam Bands

Stop the unsafe practice of taping patient ID to the incubator! Patient ID wrist and ankle bands are designed to positively identify the individual patient.

To meet the special needs of fragile neonatal patients in NICU and L&D, PDC Healthcare offers Precision® Neonatal Foam Bands for positive patient identification. The bands are made of a soft foam material that is gentle on sensitive, delicate skin.

## Precision® Neonatal Foam Band features:

- Soft, comfortable foam construction is gentle on sensitive neonatal skin
- Blank ID panel accepts handwritten information or printed label (up to) 2" length
- Adhesive shield protects critical patient ID information and bar codes
- Easy to apply using a simple hook and loop fabric closure
- Re-adjustable to accommodate IV site changes
