

# Psychiatric Patient ID Wristbands

Psychiatric and behavioral health facilities or departments have special requirements for patient identification. PDC Healthcare offers heavy-duty psychiatric patient ID wristbands that feature extra strength and durability to prevent patients from removing critical identification during the length of their inpatient stay.

## Non-Transferable

Remains on patient at all times (during showers, sleep, exercise, transportation, etc.) to maximize security.

## Durable & Tamper-Evident

Constructed of multi-laminate material for superior strength and durability. Removal requires safety scissors.

## Multiple Colors for Color-Coding

Highly visible colors allow you to color-code and categorize patients by high-risk status, medical conditions, dietary restrictions, etc.

## Accessory Products

### 4" Laminator (698)

Clincher V wristbands are most effective when used with this recommended laminator and wristband sleeves.

### Safety Scissors

Rounded-tip scissors for safe removal of psychiatric wristbands.

*Due to the high security aspect of these products, they are not sold online. Please call to order.*
