

# PROTECT WHAT MATTERS MOST

## React Mobile® Employee Safety Solution

A precise, location-based panic button and alert system built for organizations

Panic Button (actual size)

## REACT MOBILE®

# Healthcare Workers Face Greater Workplace Violence Risks

INTENTIONAL INJURIES  
to nurses by patients  
**up 70%** from 2012  
to 2018.\*

ASSAULTS  
against healthcare workers have  
**risen 44%**  
from 2015 to 2018.\*\*

With violence on the rise, employees and unions are calling for greater protections. In 2019, Congress passed a healthcare workplace violence act that requires employers to have plans to prevent violence and proposes penalty fines if hospitals fail to report violent incidents. **The time for change is now.**

## Get Help Fast with React Mobile®

React Mobile® from PDC is an employee safety solution built for organizations that allows for rapid emergency response when every second counts.

### AFFORDABLE & DISCREET

Cloud-based, wireless system with no fixed hardware is deployed quickly with minimal cost and little disruption

### TESTED & PROVEN

More reliable than app based systems and used by major brands and organizations, 460+ customers

### ENTERPRISE READY

Designed for enterprises with multi-level buildings where GPS alone isn't effective

Worldwide support capabilities, 24/7 accessibility, onsite staff training & implementation

\*According to the U.S. Bureau of Labor Statistics.

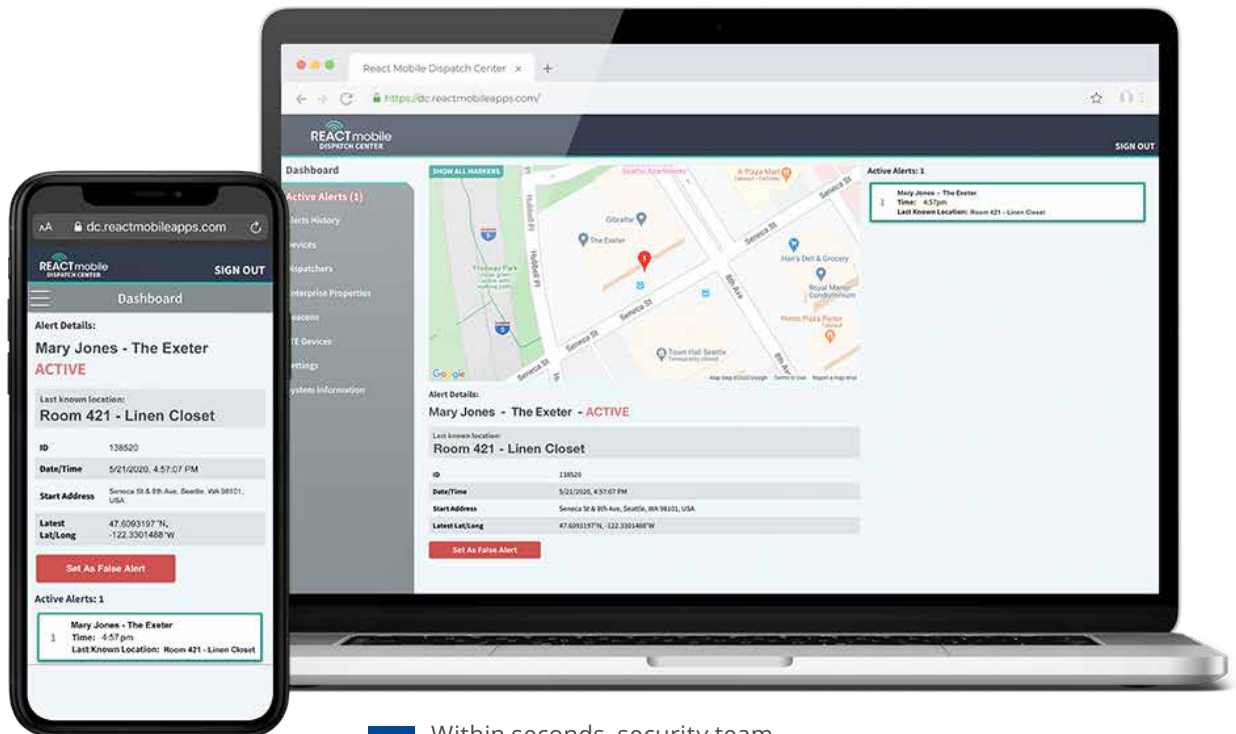

\*\*According to the 2019 Healthcare Crime Survey produced by the International Association for Healthcare Security and Safety Foundation (IAHSS Foundation) which reflects healthcare crime trends for 2012 - 2016 and 2018.

# A Simple Safety Solution

**1** Healthcare employee presses panic button

**2** The panic button pings the closest beacon to the incident and sends the location information to the cloud-based dispatch center

**3** Within seconds, security team receives alert with precise location
