Where positive identification meets safe, efficient patient care.

70% of medication errors are caused by “syringe swaps”.

A Simple Solution

Sterile Medication Labels

Meet The Joint Commission’s requirement to label all medication containers for procedures and do your part to help prevent medication errors.
Aren’t there enough risks associated with surgery? Prevent medication errors with accurate labeling.

According to the FDA, approximately 1.3 million Americans a year are injured due to medication errors. Many of these preventable mistakes are caused by incorrect medication dispensing and administration, often due to mislabeling or failure to label. Safe medication practices are critical to patient safety and preventing adverse drug events.

PDC Healthcare’s sterile medication labels provide accurate medication identification that meets regulatory requirements. Pre-printed medications and required identification fields help caregivers correctly identify and communicate medications to prevent confusion or mistakes in administration.

- **Meet Joint Commission National Patient Safety Goals**

  Goal #2: Improve the effectiveness of communication among caregivers

  Goal #3: Improve the safety of using medications

  NPSG.03.04.01: Label all medications, medication containers, and other solutions on and off the sterile field in perioperative and other procedural settings.

- Prevent medication errors caused by unlabeled or improperly labeled medications

- Improve communication among caregivers

- Choose from a wide selection of stock sterile medication labels & pens

- Customize sterile medication label kits to meet your facility’s specific needs!
PDC Healthcare’s Sterile Medication Labels are the simplest solution to help prevent medication errors.

84% of anesthesiologists agree that improved standards for drug labels reduce errors.

70% of medication errors are attributed to “syringe swaps” (misidentification of a syringe).

47% of the medication errors come from misidentification of the medication label.

Superior Label Quality Outperforms Other Brands – Compare for Yourself!

- Hermetically sealed in a sterilized pouch
- Water-resistant labels will not deteriorate in water
- Labels use permanent adhesive to strongly adhere to drug syringes and medication containers without falling off

PDC Healthcare’s Labels WILL NOT Deteriorate in Water!

Other vendors’ paper labels absorb water
Our labels are water-resistant. Ink will not bleed

PDC Healthcare’s Labels REMOVE EASIER from Metal Containers Without Leaving Messy Residue!

Other vendors’ labels leave a hard to clean mess
PDC Healthcare’s labels peel off cleanly
