Syringe Flag Labels
Identify Small Syringes & Containers to Prevent Medication Errors
Accurate Medication Labeling for Your Smaller Syringes & Containers

According to the FDA, medication errors cause at least one death every day and injure approximately 1.3 million Americans a year.

Many of these preventable mistakes are caused by incorrect medication dispensing and administration, often due to mislabeling. Safe medication practices are critical to patient safety and preventing adverse drug events.

PDC Healthcare’s family of syringe flag labels helps caregivers easily identify smaller medication syringes without obscuring the syringe or its contents for maximum patient safety. Accurate identification is critical to communicate injectable medications and to prevent confusion or mistakes in administration.

PDC Healthcare’s Syringe Flag Labels:
- Prevent medication errors caused by unlabeled or improperly labeled medications
- Provide convenient label space for medication details and bar codes
- Available in multiple sizes and formats to meet your needs
- Print on demand formats available for laser and thermal printing – Ideal for bar coding!

Meet Joint Commission National Patient Safety Goals
Goal #2: Improve the effectiveness of communication among caregivers
Goal #3: Improve the safety of using medications
NPSG.03.04.01: Label all medications, medication containers, and other solutions on and off the sterile field in perioperative and other procedural settings.

Customize any label to meet your facility’s specific needs!
Pre-Printed Flag Labels

- Convenient, pre-printed fields allow caregivers to handwrite critical drug identification information on the label
- Strong, permanent adhesive to securely apply label to syringe
- Clear tail material will not obscure the syringe contents or graduated markings
- Flexible, durable label material resists tears and withstands handling and storage

Laser Flag Labels

- Allows you to print critical drug identification information on demand with a laser printer
- Ideal for bar coding
- Non-adhesive print area serves as a flag to include drug label information and administration, handling, warning, or other instructions
- Strong, permanent adhesive to securely apply label to syringe

<table>

Thermal Flag Labels

- Allows you to print critical drug identification information on demand with a thermal printer
- Ideal for bar coding
- Strong, permanent adhesive to securely apply label to syringe
- Flexible, durable label material resists tears and withstands handling and storage
- Features exclusive to HCL6034:
  - Clear tail material will not obscure the syringe contents or graduated markings
  - Non-adhesive print area serves as a flag to include drug label information and administration, handling, warning, or other instructions
  - Flag receipt can either fold over to create an easy-to-read, double-sided label or the receipt can be removed at the perforation and applied to charts, records and packaging for traceability and accountability.

Check out PDC Healthcare’s newest pharmacy solutions designed to help you improve patient safety

Steri-Tamp® IV Bag and Vial Seals
Provide a 100% Sterile Barrier

Steri-Tamp® is the only single-use, tamper-evident seal that provides a 100% sterile barrier. Available in multiple sizes and formats for IV bags, vials, and syringes.

- Prevents retrograde contamination of drugs
- Clearly identifies if IV bag contains added medications to help prevent accidental double dosing
- Provides barrier of protection for pharmacists, technicians, and nurses against exposure to medicine
- Saves money by allowing return of unused medication to inventory

Help Prevent Medication Errors with Anesthesia Labels & Tapes

Provide accurate medication identification that meets regulatory requirements. ASTM standardized colors, drug classifications, and required identification help prevent mistakes caused by incorrect medication dispensing and administration.

- Prevent medication errors caused by unlabeled or improperly labeled medications
- Widest selection of stock label and tape sizes and formats to meet your facility’s needs
- Customized options available for any tape or label
