

# AUTOCLAVE LABELS

## Increase Workflow Efficiency

Autoclave labels enable the proper identification of equipment, instruments and supplies as they go through the autoclave process. They are designed to be applied onto a tray or tag to identify who owns the surgical equipment and instruments and their intended procedures. This helps to improve communication and efficiency, getting the items into surgery more quickly.

- Durable and lab-tested to withstand autoclave and common disinfectant solutions
- Made of premium synthetic material for thermal transfer printing
- Withstand temperatures up to 300°F
- Remain adhered through autoclave without peeling or falling off
