

Improve the Pediatric Patient Experience

Pediatric Cards Provide a Simple, Convenient Method of Distraction to Reduce Anxiety

Pediatric Cards help healthcare providers improve interactions with children by providing a simple and convenient way to entertain and distract them in potentially distressing situations, such as having blood drawn, getting a shot, or having an IV inserted.

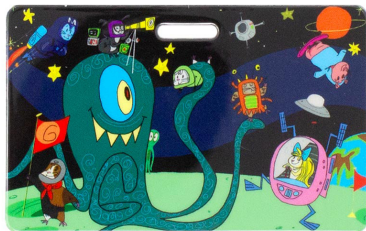

These small, badge-sized cards attach to employee ID accessories, such as badge reels, so they're conveniently accessible at all times. The cards have fun designs with hidden elements on the front featuring **Gillie Guinea Pig**, with easy prompts on the back for clinicians to use as they interact with children.

- Improve the patient experience for children, decreasing their stress and anxiety
- Increase children's cooperation to improve the efficiency and effectiveness of treatment
- Facilitate a more positive interaction between staff and patients
- Designed to attach to badge accessories for easy access
- Made of a flexible, durable material that's easily sanitized

Meet Gillie Guinea Pig!

Gillie knows what it's like to feel small in a big world. That's why he and his friends created a wholesome world about courage, kindness and love. Kids can dream big with Gillie in a number of ways, including camping, flying, deep sea diving, enjoying the fair, or launching into space!
