

LESS IS MORE

Less Hassle. More Comfort.

Ident-Alert™ Color Coded Wraps

Ident-Alert™ Color Coded Wraps

Reduce patient wristbands by 50% with an all-in-one solution*

The average inpatient wears 3 wristbands which can interfere with IV access and cause discomfort. Now there is a better way to identify special risk patients by consolidating multiple alerts on one wristband for better IV access and patient comfort.

- Highly visible with easy-to-read text and larger format
- Patent-pending wrap-around design and strong tamper-evident adhesive keeps alert securely in place
- Compatible with all laser and thermal wristbands
- Meets national standardization guidelines
- Many ways to customize alert wraps with different colors, text, and icons
